

Pro series:

Reliable device for active users

The Pro series was designed for dynamic contact centers. This headset is a versatile tool for intense work, combining robustness, stylish design and high quality of sound.

The PRO headsets are made with carefully tested materials, characterized by high resistance to mechanical damage. The headband construction is additionally reinforced with metal alloy, what ensures exceptional durability of the headset.

Wideband sound provides the consultant with capabilities to understand customers and focus on the main needs. In addition, the microphone with excellent noise cancellation eliminates noise of loud rooms, so that the customer hears only agent, not the surrounding. Taking care of concentration even more, we designed the PRO XL version – with enlarged earpieces. Larger earplates isolate the agent from the distracting office noise in a better way.

The PRO series headsets ensure concentration and workflow continuity even in the largest Call Centers that work 24/7.

Features:

- Robust and durable design
- Headband reinforced with metal alloy
- Damage-resistant materials
- Reinforced microphone boom
- Classical elegance
- Wideband sound
- Excellent noise cancellation
- Convenient size adjustment
- QD plug
- Monaural and binaural versions

Sound Quality	Wideband
Frequency Response	50Hz - 20 000Hz
Speaker Sensitivity	90dB ± 2dB on (1000Hz 1mW)
Speaker Impedance	137 ± 2% Ω
Microphone Sensitivity	-50 ± (0db = 1V/Pa, 1kHz)
Microphone Impedance	2,2 kΩ
Temperature resistance	min -20°C max +70°C
Weight (Mono/duo)	61g / 80g
Acoustic Protection	105 dB
